

STORAGE UNIT

FILUREN 565

The furniture family that includes the sofa DU & Jag and Filuren is a modern range in which diversity, norm creativity and sustainability are integral parts. The various family members differ in shape and form but still have a lot in common. They are all non-toxic, playful, tactile, functional and designed based on children's needs and the reality of the care environment. The family can grow and everyone is invited, but two also make a whole family.

Play and imagination are important tools for children when learning and developing new skills. Similarly, physical activity is essential for children's well-being and to help counteract mental illness. Aware of these facts, Filuren offers fantasy play and physical activity by being a natural part of the interior design in waiting rooms, but works equally well in libraries, preschools or similar public spaces designated for children.

In addition to offering a playful seat, Filuren provides room for storage and expresses thereby the great value and importance of play and toys, especially in a sensitive care situation. Here you can store picture books and various small toys.

Filuren primarily targets children aged 1-4 years. The furniture is safety tested and stable enough for an adult to sit on or for supporting a small child taking its first steps. The "textile ears" are made from leftover fabrics from our production of, among other items, DU & Jag.

ADDED VALUES

- Inclusive storage unit and stool for children
- Can be furnished in many different rooms
- Easy to carry
- The textile-ears are made from left over fabrics
- Tested as storage unit, stool and toy
