

100% FSC certified ash

ORKESTER 082

The inspiration for Orkester (orchestra) comes from the piano stool with its height-adjustable seat, but also from traditional wooden furniture joined together without screws and metal fittings. The collection is made of solid ash and consists of a stool and a bench with two and three seats. Orkester is perfect for schools, day care centers, waiting rooms, receptions, passageways, entrances and similar environments. Since the seats are height-adjustable, you can choose the seat height that suits you best, but still sit next to your friend, your parent or your child.
